	5. Displaying a “Are you sure you want to delete the data?” popup
6. Click “OK”	
	7. Update the " Product " database
	8. Display the update page along with an alert “Item data successfully deleted”
NORMAL FLOW: CLICK “CANCEL”	
6. Click “CANCEL”	
	8 Display the Product page

No. usecase	**USC06**
Usecase name	Logout
Actor	Admin, Owner
Desscription	Actor performs logout
Pre-Condition	- The actor has logged in - The actor is on the home page
Post- Condition	Display login page
Flow Event	
Normal Flow Event	
Actor Action	**System Reaction**
1. Clicking ”Logout”	
	2. Display popup “Are you sure you want to exit?”
3. Click “Yes”	
	4. Displaying Login page
NORMAL FLOW: CLICK “NO”	
3 Click “NO”	
	4 Display homepage

No. usecase	**USC07**
Usecase name	Add Data Employee
Actor	Owner
Desscription	The actor Add Data Employee
Pre-Condition	Actor has logged in
Post- Condition	The actor is already on the home page
Flow Event	
Normal Flow Event	
Actor Action	**System Reaction**
1. Clicking ”Data Employee”	
	2. Access the " Data Employee " database
	3. Display the Data Employee page
4. Click “Add”	
	5. Display the " Add Employee " input form, consisting of: - fullname : varchar(20) - username : varchar(10) - password : varchar(10)
6. Fill out the form	
7. Click “Save”	
	8. Save to the database
	9. Display the " Product " update page
ALTERNATIVE FLOW: DATA NOT VALID	
7. Click “Save”	
	8. Check data valid
	9. Show Message “The data field is required/duplicated”

No. usecase	**USC08**
Usecase name	Edit Data Employee
Actor	Owner
Desscription	The actor Edit Data Employee
Pre-Condition	Actor has logged in
Post- Condition	The Data Employee sucessfully edited
Flow Event	
Normal Flow Event	
Actor Action	**System Reaction**
1. Clicking ” Data Employee”	
	2. Access the " Data Employee " database
	3. Display the Data Employee page
4. Click “Edit”	
	5. Display the " Add Employee " input form, consisting of: - fullname : varchar(20) - username : varchar(10) - password : varchar(10)
6. Fill out the form	
7. Click “Save”	
	8. Save to the database
	9. Display the Data Employee update page
ALTERNATIVE FLOW: DATA NOT VALID	
10. Click “Save”	
	11. Check data valid
	12. Show Message “The data field is required/duplicated”

No. usecase	**USC09**
Usecase name	View Data Employee
Actor	Owner
Desscription	The actor view product
Pre-Condition	- The actor has logged in - The actor is on the home page - Data Employee has been added
Post- Condition	Displaying all data Data Employee
Flow Event	
Normal Flow Event	
Actor Action	**System Reaction**
1. Clicking ” Data Employee”	
	2. Access the " Data Employee " database
	3. Display the Data Employee

No. usecase	**USC10**
Usecase name	Delete Data Employee
Actor	Owner
Desscription	The actor delete Data Employee
Pre-Condition	- The actor has logged in - The actor is on the home page - Item data has been added
Post- Condition	Product successfully deleted
Flow Event	
Normal Flow Event	
Actor Action	**System Reaction**
1. Clicking ” Data Employee”	
	2. Access the " Data Employee" database
	3. Display the Data Employee page
4. Click “Delete”	
	5. Displaying popup “Are you sure you want to delete the data?”
6. Click “OK”	
	7. Update the " Data Employee " database
	8. Display the update page along with an alert “Item data successfully deleted”
