Business Value:

Intangible Benefits:
- Simplifies data compilation
- Reduces calculation errors
- Facilitates flexible access to product data, provided the device is connected to the internet
- Enables forecasting of future stock requirements

Tangible Benefits:
- Reduces operational costs by approximately 5.23% of total annual turnover
- Shortens the reconciliation process by +/- 2 hours

Special Issues Or Constraints:
- Website-based system
- The system is accessible only to employee administrators and the owner
- Employee accounts can only be registered by the owner
- The prediction feature is limited to the seed category
- System maintenance takes place between 00:00 and 02:00 WIB (Western Indonesian Time)
